Pick 1/2 UGC (user generated content) websites or apps and learn as much as you can about promoting on them

Find relevant communities, hashtags, content ideas and post to that every single day.

Every. Single. Day.

It's hard, but we'll offer the biggest tip on the next page.

KEEP THEM HAPPY

Find best use practices for your personal social profiles and follow them.

For instance, post to Instagram at least once every day. Tweet at least 5 times per day.

Don't just post and leave: engage with your fans!

Put up new content every single day.

Every. Single. Day.

WHY EVERY SINGLE DAY?

By posting new content every single day you're building up a **catalog** and are going to **learn** what works and doesn't work very fast.

Have you ever heard a new artist and looked for more music by them? What's better for you: they only have that one single you heard or they have 5 whole ass albums for your listening pleasure? That's what you're trying to do. Get them addicted, begging for more, and buying whatever you produce.

THE BIGGEST TIP

Putting out new content every single day can be incredibly difficult. A major tip is to set aside one whole day to create and plan your content for the rest of the week. This works great for people working a full-time gig. Get 7 outfits ready and start producing then "drip" them out over the week.
